

# Get Found. Get Drove

Droved helps local businesses dominate Google Maps, local search, and AI platforms like ChatGPT and Gemini.

**DROVED**

Most local businesses struggle to get seen online. You might have a Google Business Profile, some reviews, and a website, but competitors still show up first and now AI tools are recommending them instead of you.

That's where Droved comes in.

We specialize in **Local SEO and AI Search Optimization** to make sure your business is chosen not overlooked.
